

## What is KODX

King Of DeFi is a Smart contract platform designed to ease the bottlenecks in the Financial ecosystem and make it easy for individuals and corporate Firms to have access to sources of Financing their businesses

Accessing loans from banks and financial institutions are increasingly difficult as a result of the high interest rates as well as the huge collateral required. This is one of the major issues KODx intends to disrupt. We hope to free people from these yokes and create an enabling environment for businesses to thrive, especially in accessing loans effortlessly.

## LENDING

Certain individuals have some funds to invest in legitimate businesses and earn interest. However, they are unable to decide where to invest their money because of the several cases of financial frauds online. KODX offers such investors the opportunity to get connected with borrowers and earn some decent interests. Our system is highly secure, transparent and trustworthy. Everything would be handled by smart contract, no third party.

## BORROWING

Our borrowing program is designed to make Stable coins, or some crypto funds available for individuals or firms in need of such but are finding it difficult to raise the kind of collateral required For that. With the borrower program, you are easily covered. KODX and TRX are only the means of collateral.
